

Intelligent Performance Management with Oracle BI Beans

Qubeview is a complete suite of tools for reporting and analysis on Oracle 9i OLAP technology. Qubeview aggregates the Oracle BI Beans™ component architecture to provide three integrated products to analyze, model and publish enterprise information.

The Qubeview suite comprises:

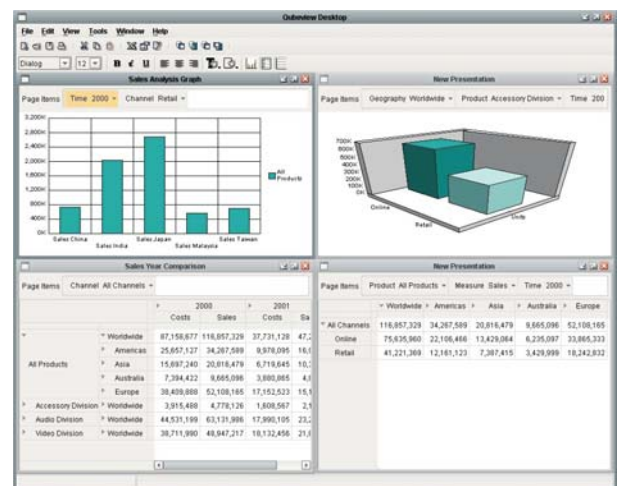

Qubeview Desktop
a Java based client tool for analysts.

Qubeview Web
a web based reporting and analysis system.

Qubeview Spreadsheet Add-In
a 9i OLAP add-in for financial users.

The three products fulfil the broad spectrum of BI requirements for any organisation, allowing information providers to work in the environment most suited to them. Wizard driven report creation allows end-users to analyze large volumes of data quickly and effectively. Formatting and publication of completed reports and views is a simple matter of saving to a central BI repository.

Qubeview provides a user-friendly environment for controlling access to these reports in a simple but secure environment. Central to the extensible foundation of Qubeview is a plug-in architecture that allows custom development of new functions. Qubeview exposes a series of programming "hooks" that allow customized additions to the base product. Typical client requirements that can be accommodated by plug-in development include drill-through, web services, workflow and high-end analysis using the Analytic Workspace.

Qubeview Desktop.

Qubeview Product Features

Qubeview Desktop and Qubeview Web provide out-of-the-box systems for slicing, rotating and drilling through Oracle 9i OLAP cubes.

Qubeview Desktop

Wizard driven report building.
Crosstab, Graph and Table Presentations.
Data-driven formatting.
Plug-In Architecture.
Multi-Document Interface.
"Fast-Favorites".

Qubeview Web

Zero-footprint web access to reports.
Switchable thick client for power-users.
Central BI Catalog.
User and Folder Administration.
Role-based control of report presentation.

Qubeview Spreadsheet Add-In

Single value retrieval functions.
OLAP Catalog and AW support.
Wizard driven syntax builder.
HTML Publishing engine.

System Requirements

Qubeview Desktop

Database Platform: SUN Solaris, Windows NT/2000/XP.
Software: Oracle9i R2 & OLAP Option.
Client Platform: SUN Solaris, Windows NT/2000/XP.
Software: JRE 1.3.1 or above.
(Spreadsheet Add-In Windows NT/2000/XP only).

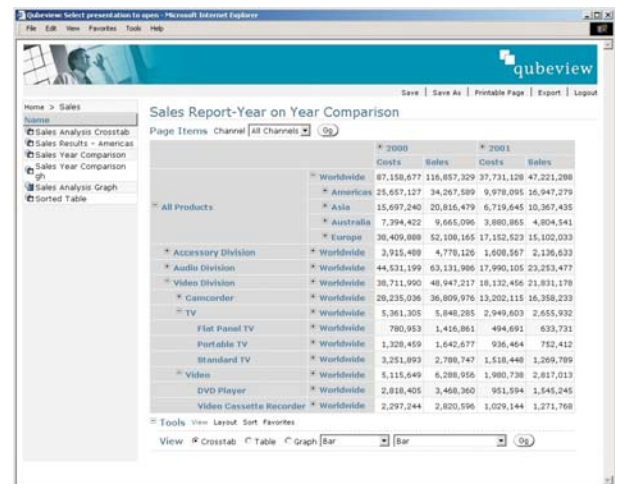

Qubeview Web

Database Platform: SUN Solaris, Windows NT/2000/XP.
Software: Oracle9i R2 & OLAP Option.
Application Server Platform: SUN Solaris, Windows NT/2000/XP.
Software: Oracle9iAS R2.
Client Platform: Windows NT/2000/XP.
Software: Microsoft Internet Explorer 5.5 or above.

Qubeview is a plus consultancy product.

The screenshot shows a web browser displaying a report titled "Sales Report-Year on Year Comparison". The report is presented as a table with columns for "Costs" and "Sales" for the years "2000" and "2001". The data is organized into a tree structure on the left, including categories like "All Products", "Accessory Division", "Audio Division", "Video Division", "Camcorder", "TV", "Flat Panel TV", "Portable TV", "Standard TV", "Video", "DVD Player", and "Video Cassette Recorder".

		* 2000		* 2001	
		Costs	Sales	Costs	Sales
Worldwide		67,158,677	116,657,329	37,731,128	47,221,288
Americas		25,657,127	34,267,589	9,978,095	16,947,279
Asia		15,697,240	20,816,479	6,719,645	10,367,435
